- "What if" scenario testing
- Relationships between guidelines "pop-up" when in effect

The screenshots show the following components:

- OFFENSE LEVEL CALCULATION:** A window for entering case details like defendant name, date of birth, and offense level.
- Sentencing Table:** A grid showing sentencing ranges for different offense levels and criminal history categories.
- Worksheet A (Offense Level):** A summary sheet for a specific case, including defendant information and offense details.
- USGS 4B1.2(1):** A window displaying the definition of "crime of violence" from the Sentencing Guidelines.
- CrimeTime WORKSHEET #, John Doe:** The main interface showing a table of charges with columns for Case, Defendant, Charges, History, Calculation, and Sentence. Below the table are sections for Charge Details, Count Group, and Summary (Charge).
- Hypertext Legal Authority:** A pop-up window showing legal text with a red arrow pointing to a specific sentence.

Visit sentencecalculation.com for an in-depth example of CrimeTime at work.

“Having prepared pre sentence reports that include the sentencing guideline calculation since its inception, I have a great appreciation for the work put into this program.”
—Federal Probation, NJ

Take the Sting out of Drug Offenses.

Specify the substances and the quantities. CrimeTime automatically converts to marijuana equivalents when appropriate and determines the base offense level. If you choose to be "coached" through the process, CrimeTime will advise you of the laws describing relevant conduct and the rules regarding weight calculations.

Dynamic Links

Stay up to the minute with recent case law changes with "dynamic links" to Lexis and Westlaw online services.

Relevant Law is Displayed.

Statutes, guidelines and case law are never more than a mouse click away. CrimeTime displays relevant law in hypertext fashion. This allows you to "drill down" and view additional authority.

Criminal History

Calculating Criminal History Levels is easy. Specify the history item and click the mouse to describe the sentence. CrimeTime instantly calculates the History Level.
